Pharmacology is the most difficult aspect of the NCLEX licensure examination for both practical and registered nurses. With new drugs introduced every day and drug interactions a more serious concern than ever before, nursing students need quick, convenient access to up-to-date drug information in order to pass their licensure exams. In a market dominated by lengthy tomes priced nearly double, the 'Pharmacology Made Easy' study guides are the most efficient and economical review choices available. In each book, 295 carefully prepared written test questions cover drug actions, adverse reactions and side effects, contraindications and precautions, interactions, nursing considerations, and therapeutic benefits for more than 600 medications. Complete rationales for correct and incorrect answers are provided. Each book includes a 100-item interactive practice test on disk. Book and Disk.

Fully revised to conform to the 2003 NCLEX Test Plan, this study guide and test includes "hot spot," fill-in-the-blank, and check-the-box questions to reflect the new test format with 10 written practice tests covering all the body systems, plus two additional practice tests on mental health and miscellaneous topics. Altogether, more than 500 practice test items are provided. Each practice test includes a system overview and complete rationales and explanations for both correct and

The purpose of this pharmacology study guide is to help nursing graduates work through the vast amount of pharmacological knowledge required for the NCLEX-RN(r) in a systematic and purposeful way. The breadth and detail of the knowledge required of pharmacological concepts often overwhelms new graduates when they are beginning their exam preparation. This guide organizes content using the current NCLEX-RN(r) Test Plan (2016-2019) and provides specific strategies to address pharmacological areas of review which may challenge new graduates in their exam preparation. The guide was created by an experienced undergraduate nurse educator specializing in critical thinking development and application for high stakes exam writing. Many candidates, while studying for the NCLEX-RN(r), often forgo studying pharmacological concepts in the detail required for the exam. Unique to this Pharmacology Guide is a five step algorithm, created by the author, to help graduates approach drug-to-drug interaction questions. This algorithm is designed to help uncover correct answers by using pharmacological principles rather than memorizing drugs that interact with one another. The purpose of the modules in this Pharmacology study guide series are to:

- * Provide in-depth review of the major drug classes from a systems approach (e.g. respiratory, nervous system etc...) to help increase retention of key concepts and encourage application of pharmacological therapy in the context of disease management.
- * Summarize important information related to drug therapy and guide graduates to in-depth review of serious adverse events associated with medications. The modules will contain summary tables, review questions and exercises for key concepts.
- * Direct the reader to important

areas for client assessment during drug therapy This is a working pharmacology study guide, so while key information will be presented and organized for review, it is up to you to do the detailed work of content review by answering the questions and exercises in each module The following resources are recommended to use with this pharmacology study guide:

1. Pharmacology textbook. This resource will contain the detailed information pertaining to drug classes and specific nursing considerations related to drug therapy.
2. Drug guide. These resources contain alphabetized drug information and outline pharmacokinetic and pharmacodynamics characteristics of medications. You will find important information related to the absorption, distribution, metabolism and excretions of drugs- as well as protein binding and therapeutic index.
3. An online drug repository if the resources above do not contain the information needed to answer the questions in the guide.

Each module contains practice questions using NCLEX-RN(r) formatted questions. It is recommended that you seek additional practice questions from resources that challenge you to go into pharmacological concepts such as serious adverse events and drug-to-drug interactions in detail and test your knowledge specific nursing interventions related to drug therapy. There are a total of 12 working Modules covered in the Pharmacology Study Guide:

- Module 1: Understanding Drug-to-Drug Interactions
- Module 2: Drugs Affecting the Respiratory System
- Module 3: Drugs Affecting the Nervous System
- Module 4: Drugs Affecting the Gastrointestinal System
- Module 5: Vascular and Cardiac Medications
- Module 6: Drugs Affecting the Urinary and Renal System
- Module 7: Anti-Infective Medications
- Module 8: Drugs Affecting the Endocrine System

Emphasizing safe and effective drug administration, *Introduction to Clinical Pharmacology, 10th Edition*, helps you understand the principles of pharmacology and prevent medication errors. It promotes safety by showing how drugs and drug classes work, so you can understand why drugs are given, as well as the adverse effects and drug interactions that may occur. A thorough nursing process section with each drug class outlines the nurse's role when administering drugs. The updated Get Ready for the Next Generation NCLEX® Examination! feature offers case studies with Next Generation NCLEX-format questions to help you prepare for the new licensure examination. Ideal scope of content and readability for LPN/LVN programs includes basic, need-to-know pharmacology content. Safety Alert boxes highlight important nursing considerations for safe medication administration and monitoring. Lifespan Considerations boxes for children and older adults draw attention to information that would be especially important when giving a specific drug to patients of those age groups. A focus on understanding drug classes helps students understand the actions and uses of drug classes and provides a framework for safe, effective practice as new drugs are introduced to the market. Video clips on medication administration procedures provide students with a visual reference for safe medication administration. Key terms with phonetic pronunciations and text page references help improve students' terminology and language skills before they enter clinical practice. Essential content is highlighted throughout the text, as in all of Elsevier's LPN Threads textbooks, with features such as Top Tips for Safety, Memory Joggers, and Lifespan Considerations boxes. NEW!
