This new edition continues to explain common mathematical principles in veterinary terms. With the introduction of the Evolve platform, both student and qualified nurses or technicians benefit from an interactive site where they can test their knowledge with interactive questions and quizzes; while instructors can create their own quizzes and tasks to use as aids in their teaching. Drawing upon his extensive experience, Terry Lake also provides a method of conversion that simplifies equations and removes the necessity of memorizing formulae.

Terry Lake is also joined in this second edition by Nicola Green, an experienced instructor in dosage calculations who has devised the Evolve component. The text uses a commonsense approach to clinical situations faced by every student and qualified practitioner, highlighting common errors and providing tips for avoiding potential pitfalls. This extremely useful text takes the student from the secure ground of decimals and percentages, through to the uncharted terrain of statistics and dimensional analysis – all in an easily accessible and user-friendly style. School-based food and nutrition education (SFNE) helps schoolchildren and the school community to achieve lasting improvements in their food practices and outlooks; build the capacity to change and to adapt to external change; and pass on their learning to others. SFNE has also an important role in complementing efforts that are being made globally to improve food environments, and in empowering children and adolescents to become active participants in shaping the food system to be better able to deliver healthy and sustainable diets. Despite increasing interest for SFNE, the evidence that supports it and its potential, much of traditional SFNE, particularly in LMICs, is largely underfunded, not delivering results, and disconnected from other key interventions that aim to support the food, nutrition, environment, and education nexus. SFNE is under-resourced, with capacity development opportunities lacking throughout the school system. This White Paper is the first document of its kind, and it is based on the evidence, professional expertise, and field experience, lessons learned, and documented challenges of SFNE work in a variety of contexts. It presents the case for raising the profile and transforming the vision and learning model of SFNE. This document is

As an academic subject, nutrition has grown enormously in recent years and with it the need for specialist textbooks on the subject. In response to this need, a decision was taken by The Nutrition Society to produce a ground-breaking series of four textbooks, of which Public Health Nutrition is the third. The books in the series: Provide students with the required scientific basis in nutrition, in the context of a systems and health approach. Enable teachers and students to explore the core principles of nutrition and to apply these throughout their training to foster critical thinking at all times. Each chapter identifies the key areas of knowledge that must be understood and also the key points of critical thought that must accompany the acquisition of this knowledge. Are fully peer reviewed to ensure completeness and clarity of content, as well as to ensure that each book takes a global perspective and is applicable for use by nutritionists and on nutrition courses throughout the world. Public Health Nutrition is an essential purchase for students majoring in nutrition and dietetics. Public health nutrition as a subject is growing immensely in importance, taking into account the real potential to reduce the burden of non-communicable chronic disease through diet. Professionals in nutrition, dietetics, food science, medicine, community health care and many related health care areas will all find much of great

The purpose of this study was to measure the general knowledge and the nutrition knowledge of pressure ulcer care of RDs in practice with regards to education, years of experience, age, different work settings, recency of exposure to educational material, and interest level towards working with older adults. Participants that were included in the study were 760 Ohio licensed RDs. The survey

included demographics and 40 multiple-choice questions. Multiple-choice questions were divided into two parts: nutrition and treatment. Independent sample t-tests, ANOVAs, and Pearson's correlations were used to compare the scores of the nutrition and the treatment section with the data collected.

Significance was set a priori at $p < .05$. Results of this study showed that there were no differences in pressure ulcer test scores with regards to the level of education; however, significance was found in years of experience, age, different work settings, recency of exposure to educational material, and interest level towards working with older adults. Study findings suggest that continuous exposure of updated pressure ulcer educational material throughout the RDs' career, particularly RDs who work in hospitals or long-term care facilities, is important for maintaining or increasing knowledge of pressure ulcers.
