Twenty-five years after the original radio series of *The Hitchhiker's Guide to the Galaxy* exploded into the public consciousness, the further exploits of its bewildered hero Arthur Dent were finally adapted for radio by Dirk Maggs, in part using drafts written by Douglas Adams before his death. The resulting fourteen completely new episodes were produced by Above the Title Productions and broadcast on BBC Radio 4, with nearly all of the original cast reunited for recording. *The Hitchhiker's Guide to the Galaxy Radio Scripts Volume 2* brilliantly bring to life the last three books in Adams' perennially popular Hitchhiker series: *Life, the Universe and Everything*; *So Long, and Thanks for All the Fish*; and *Mostly Harmless*. Dirk Maggs supplies notes which highlight original Adams material and explain how the cast, special effects and music were directed. The scripts are introduced by Simon Jones, who played Arthur Dent in both the original and the recent radio series, as well as in *The Hitchhiker's Guide to the Galaxy* television series. Douglas Adams first conceived *The Hitchhiker's Guide to the Galaxy* for radio and it is an honour to his memory that all five Hitchhiker novels have now been adapted for this medium. These scripts exemplify the freshness of perspective, humour and perspicacity that epitomize the work of Douglas Adams.

American Read It's an ordinary Thursday morning for Arthur Dent . . . until his house gets demolished. The Earth follows shortly after to make way for a new hyperspace express route, and Arthur's best friend has just announced that he's an alien. After that, things get much, much worse. With just a towel, a small yellow fish, and a book, Arthur has to navigate through a very hostile universe in the company of a gang of unreliable aliens. Luckily the fish is quite good at languages. And the book is *The Hitchhiker's Guide to the Galaxy* . . . which helpfully has the words DON'T PANIC inscribed in large, friendly letters on its cover. Douglas Adams's mega-selling pop-culture classic sends logic into orbit, plays havoc with both time and physics, offers up pithy commentary on such things as ballpoint pens, potted plants, and digital watches . . . and, most important, reveals the ultimate answer to life, the universe, and everything. Now, if you could only figure out the question. . . .

'I've experienced all the different roles you have to play when there's nobody else around: a parent, a dad, a father, a stand-in mum, a confidant, always a butler or maid, a teacher and, most crucially, a friend.' In this enlightening but also very practical book, Roger McEwan shares the lessons he's learned from years as a solo dad. It is not, he insists, a self-help book. But amidst the rich, always fascinating, often hilarious experiences of his times with his two children are dozens and dozens of useful pieces of advice for parents – from developing a great relationship with your ex (if you can) to letting the children pick the clothes they want to wear, teaching them to cook, and acknowledging that changing a toilet roll is too complex for anyone under the age of eighteen to understand. **

This book discusses the latest advances in research and development, design, operation and analysis of transportation systems and their complementary infrastructures. It reports on both theories and case studies on road and rail, aviation and maritime transportation. The book covers a wealth of topics, from accident analysis, vehicle intelligent control, and human-error and safety issues to next-generation

transportation systems, model-based design methods, simulation and training techniques, and many more. A special emphasis is given to smart technologies and automation in transport, as well as to user-centered, ergonomic and sustainable design of transport systems. The book, which is based on the AHFE 2016 International Conference on Human Factors in Transportation, held on July 27-31, 2016, in Walt Disney World®, Florida, USA, mainly addresses transportation system designers, industrial designers, human-computer interaction researchers, civil and control engineers, as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy-makers and social scientists dealing with traffic safety, management, and sustainability issues in transport.

A concise and accessible primer on the scientific writer's craft The ability to write clearly is critical to any scientific career.

The Scientist's Guide to Writing provides practical advice to help scientists become more effective writers so that their ideas have the greatest possible impact. Drawing on his own experience as a scientist, graduate adviser, and editor, Stephen Heard emphasizes that the goal of all scientific writing should be absolute clarity; that good writing takes deliberate practice; and that what many scientists need are not long lists of prescriptive rules but rather direct

engagement with their behaviors and attitudes when they write. He combines advice on such topics as how to generate and maintain writing momentum with practical tips on structuring a scientific paper, revising a first draft, handling citations, responding to peer reviews, managing coauthorships, and more. In an accessible, informal tone, The Scientist's Guide to Writing explains essential techniques that students, postdoctoral researchers, and early-career scientists need to write more clearly, efficiently, and easily.
