Several years ago, Lea Finn walked away from her big-city corporate career. She bought a Key West–style home in Bradenton, Florida, and spent her days kayaking, swimming, and lounging in a hammock. Her nights were filled with sizzling romance and tales of adventure in idyllic locations. And of course, a few hours of sleep! The only flaw in her newfound perfect lifestyle was the dead lady's house next door, or so she thought...KC Bradlow is a prominent attorney. He is known for his professionalism, eye for detail, and superior trial skills. The consensus according to the legal secretaries across Bradenton: he is an absolute and total hunk. The "grapevine" was usually focused on the hearsay of who he was or wasn't sleeping with at the moment. And KC, at times, liked to fuel the secretaries wagging tongues. Who better to help him with the speculations was none other than his sister and fellow attorney, Kristianna Romanoff? But there are some who are not interested in the exquisite but unattainable body of KC Bradlow. Rather, they could think of no greater pleasure than to wipe the smile from his beautiful face and end his perfect life...KC is a smart attorney. Can he figure out how to stop the destruction of everything he loves and holds dear to him before his time runs out?

Through his work in motion pictures, Lloyd Bridges appreciated the impact of skin diving upon this medium and presented an exciting picture of future possibilities in underwater photography. The author's role in Sea Hunt made him keenly aware of the revolution developing in the fields of salvage diving, treasure hunting, search and rescue, science, gold mining, and other virgin areas open to skin divers with imagination and enterprise. He described methods, techniques, and tools already in use and gave an exciting glimpse of future possibilities. First published in 1960, here is the complete story of skin diving as an exciting new field for fun, adventure, and opportunity open to millions of average swimmers. Those who are willing to accept the challenge of exploring and conquering a new world can benefit from past mistakes and the accumulation of experience by early skin divers; and perhaps become tomorrow's pioneers who have yet to conquer the problems of great depths and reap the harvest on the bottom of the sea.

A fascinating journey with the sea creature that has captured human imagination for thousands of years Poseidon's Steed trails the seahorse through secluded waters across the globe in a kaleidoscopic history that mirrors man's centuries-old fascination with the animal, sweeping from the reefs of Indonesia, through the back streets of Hong Kong, and back in time to ancient Greece and Rome. Over time, seahorses have surfaced in some unlikely places. We see them immortalized in the decorative arts; in tribal folklore,

literature, and ancient myth; and even on the pages of the earliest medical texts, prescribed to treat everything from skin complaints to baldness to flagging libido. Marine biologist Helen Scales eloquently shows that seahorses are indeed fish, though scientists have long puzzled over their exotic anatomy, and their very strange sex lives — male seahorses are the only males in the animal world that experience childbirth! Our first seahorse imaginings appeared six thousand years ago on cave walls in Australia. The ancient Greeks called the seahorse hippocampus (half-horse, half-fish) and sent it galloping through the oceans of mythology, pulling the sea god Poseidon's golden chariot. The seahorse has even been the center of a modern-day international art scandal: A two-thousand-year-old winged seahorse brooch was plundered by Turkish tomb raiders and sold to the Metropolitan Museum of Art in New York. A book that is as charming as the seahorse itself, *Poseidon's Steed* brings to life an aquatic treasure. Seahorses lead quiet lives, tucked away out of sight on the seafloor. It is rare to catch a glimpse of a seahorse in its natural habitat. But even if few have seen one live, these exotic, seemingly prehistoric creatures exist quite vividly in our imaginations and they have mesmerized scientists, artists, and storytellers throughout time with their otherworldly rarity. *Poseidon's Steed* is a sweeping journey that takes us from the coral reefs and seagrass meadows of Indonesia where many seahorses make their natural habitat to the back streets of Hong Kong where a thriving black market seahorse trade is concealed. Throughout history, seahorses have surfaced in some unexpected places and Scales also follows the seahorse back in time, from our most rudimentary seahorse imaginings six thousand years ago on cave walls in Australia, to the myths of ancient Greece. Scientists have long puzzled over seahorses' unusual anatomy and their very strange sex lives. And male seahorses are the only males in the animal world that experience childbirth! Seahorses are not what scientists call a "keystone" species. They rely on a healthy ocean to survive, but the marine ecosystem does not rely on them. But their delicate beauty reminds us that we rely on the seas not only to fill our dinner plates, but also to feed our imaginations.

Still waters run deep, and for one man, the draw of the sea's deep waters would direct the course of his entire life—a life full to overflowing with humor, drama, kinship, and a pure and abiding faith that keeps him afloat even in the darkest of storms. These are his stories, and through them, the author invites you to feel the wind in your hair, the sea spray on your face, and the buoyancy of spirit that can only be truly felt when in the company of good friends and family.

Almost a hundred years ago, a major terrestrial event reshaped the earth's coastlines. Goodbye entire cities. Goodbye entire states. Goodbye entire countries. And when the authorities outlawed salvaging from these sunken sites, why say hello to a new breed of criminal: underwater reclamation specialists. Even a hundred years later, there's still a whole lot of loot for the reclaiming. Bosses are dead. Her father kidnapped. And no one has a clue why. Isa, Pao, and Winn rush back to her father's estate for answers, but only finds guns, assassins, and relentless pursuit. Forced into a desperate escape, Isa must retreat further into her past to stay alive. Dejected and back in the miserable gutters she started from, Isa starts to piece together the disparate events of the past several months. Unfortunately, the trail leads back to England, the site of the most daring underwater heist in history and a buzzing hive of pissed-off Brits clamoring for the thieves' throats. Confused and on the run for their lives, Isa must unravel the unthinkable: Cleaners declaring open war. More than just their own lives depend on it. *Sunken City Capers* is a fun post-apocalyptic series with no zombies, just criminals and mischievous ne'er-do-wells. Fans of heist novels/movies and strong female protagonists will likely enjoy this series. *Sunken City Capers* Books: *The Solid-State Shuffle*, Book 1 *The Elgin Deceptions*, Book 2 *Leverage*, Book 3 *The Brummie Con*, Book 4 *Book 5 Coming Soon!*

This volume follows and updates *AN ANNOTATED BIBLIOGRAPHY ON DIVING AND SUBMARINE MEDICINE* published by Gordon and Breach, Science Publishers, Inc., in 1971. The time period covered is primarily the calendar years 1970 and 1971. Also included, however, is much material from the calendar years 1968 and 1969 not in the previous publication. A brief analysis of the sources of material precedes the citations and abstracts, which comprise the main section of the volume. The bibliography is followed by a permuted subject index and an author index. Also included, following the indexes, is a micro thesaurus. Although no attempt has been made to do a critical subject analysis, such an analysis could be accomplished through selecting a particular subject, looking up the appropriate key works in the rotated index, identifying the abstracts, analyzing them, obtaining complete copy as desired, and completing the critical review. Over 1,000 total pages .... INTRODUCTION 1-1.1 Purpose. This chapter provides a general history of the development of military diving operations. 1-1.2 Scope. This chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology. As with any endeavor, it is important to build on the discoveries of our predecessors and not repeat mistakes of the past. 1-1.3 Role of the U.S. Navy. The U.S. Navy is a leader in the development of modern diving and underwater operations. The general requirements of national defense and the specific requirements of underwater reconnaissance, demolition, ordnance disposal, construction, ship maintenance, search, rescue and salvage operations repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations, wartime

salvage, and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry-docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft.

Sam Force travels to Belize to investigate an ancient and evil secret society in this second novel of the Pyramid Hunters series, which School Library Journal called a mix of "Indiana Jones, National Treasure, and The Da Vinci Code." Sam heads to Belize to continue his investigation into his parents' mysterious disappearance and to learn more about secret of the pyramids. But after being kidnapped by crocodile cultists, will he ever be able to find the answers he's looking for?

They called it the Eighth Wonder of the World. For more than two hundred years, the world marveled at the fabled Amber Room. And then came the Nazis. Since the second World War, one of the world's most magnificent lost treasures has lain hidden, and it's up to Navy SEALs Dane Maddock and "Bones" Bonebrake to find it again. Joined by Zara Leopov, their squad must follow the trail of clues from history in a perilous, action-packed race to find a treasure and unlock a deadly secret hidden in AMBER. Praise for David Wood and the Dane Maddock Adventures "Dane and Bones.... Together they're unstoppable. Rip roaring action from start to finish. Wit and humor throughout. Just one question - how soon until the next one? Because I can't wait." Graham Brown, author of Shadows of the Midnight Sun "What an adventure! A great read that provides lots of action, and thoughtful insight as well, into strange realms that are sometimes best left unexplored." Paul Kemprecos, author of Cool Blue Tomb and the NUMA Files "A page-turning yarn blending high action, Biblical speculation, ancient secrets, and nasty creatures. Indiana Jones better watch his back!"—Jeremy Robinson, author of SecondWorld "With the thoroughly enjoyable way Mr. Wood has mixed speculative history with our modern day pursuit of truth, he has created a story that thrills and makes one think beyond the boundaries of mere fiction and enter the world of 'why not?'" --David Lynn Golemon, Author of Ancients, Event, Legend, and Leviathan "A twisty tale of adventure and intrigue that never lets up and never lets go!" --Robert Masello, author of Bestiary and Blood and Ice "Let there be no confusion: David Wood is the next Clive Cussler. Once you start reading, you won't be able to stop until the last mystery plays out in the final line." Edward G. Talbot, author of 2012: The Fifth World "I like my thrillers with lots of explosions, global locations and a mystery where I learn something new. Wood delivers! Recommended as a fast paced, kick ass read." J.F. Penn, author of Desecration

QUANTUM COMPUTERS IN COMBAT FOR THE WORLD! This book is the second in a series, picking up from the harrowing action within COVERT CATASTROPHE. Oakland Paramedic Jim Sanderson continues with the Navy Seals, his father Dr. Kepple, Physicist Judy and Justine, and his new bride Laura. Traveling beneath the world's oceans aboard a sentient, artificially intelligent submarine in the form of a 300-foot manta ray, they continue their quest to destroy a group of AQCs (Adiabatic Quantum Computers) networked into CERN and the LHC (Large Hadron Collider). New secret technologies of their own design along with improvised tactics are merged with Jim and Laura's newly realized quantum entanglement. Each now linked to their personal quantum computers, they must destroy the AQCs before the LHC opens a portal into another dimension, an act designed to terraform planet Earth for a new race of beings hell-bent upon entering our world.
