The market-leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of today's student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision-making purposes within an organisation, however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real-world mini cases, the text brings home the relevance of the subject matter to the real world of business.

Decision-making is a pivotal function of any manager. A knowledge of Accounting, insofar as it affects decision-making, is very important for a manager. And very often, students find Accounting as one of the 'tough' subjects to handle. This book strives to make Accounting intelligible and easily comprehensible to students. The text gives a comprehensive coverage of the three branches of Accounting – Financial Accounting, Management Accounting, and Cost Accounting. It focuses on the various methods and techniques followed in the Management Reporting System. The text deals, in detail, with various accounting transaction procedures, methods of costing, ratio analysis, budgeting, forecasting, accounting errors, funds flow and cash flow statements, trial balance and balance sheet, and so on. It equips the students with the knowledge in the preparation, analysis, evaluation, and interpretation of financial statements, which will enrich their managerial competence and decision-making skills. KEY FEATURES ? Emphasises the various accounting and decision-making techniques. ? Provides a number of problems and their solutions, besides giving notes, working notes, and exercises, to help the students understand the concepts better. This book is intended as a text for the postgraduate students of Management (MBA/MIB), financial courses (MFC), and undergraduate and postgraduate students of Commerce and those pursuing MCA. In addition, the book will be very useful to practising managers who wish to develop effective and result-oriented decision-making skills.

This book is about the design and working of management accounting and control systems from an organizational sociology perspective. It does not deal with the application of quantitative techniques; instead the focus is on the organizational and people side of accounting and control systems--how they are used to influence, motivate and control what people do in organizations. The author's highly successful first book on this topic, *The Social Software of Accounting and Information Systems* (Wiley, 1985) was much acclaimed for its lucid style and careful analysis of the application of theory in practice. This new book offers that same clarity and accessibility in a study which focuses on new developments in organizational sociology at the macro level. The book outlines nearly twenty frameworks for

investigating and understanding management accounting and control systems. These frameworks illustrate five distinctive paradigms of organizations and the social world. Case studies are used to bring these frameworks to life and to show how they can be used to analyze, diagnose and resolve real world management accounting and control systems problems and issues. Norman B. Macintosh is a professor at Queen's University, Canada where he teaches in accounting and control. "If you want to know what has been happening at the frontiers of management control research then you could not do better than starting with this book. The exposition is not only of value to scholars on upper level courses grappling with current theory and research but also to the thinking creative executive involved in control system design in today's changing and turbulent business environment. The book is an essential addition to the bookshelf of any management control specialist seeking intellectual stimulation through ideas coupled to practical implementation." Professor Trevor Hopper University of Manchester, UK "This book is required reading for any practitioner or student who desires a sophisticated and intellectually challenging understanding of management accounting." Richard J Boland, Jr Case Western Reserve University, USA "In these days of globalisation and intensified interaction between management cultures the interest in the behavioural and social side of management accounting and control is growing. This is a timely and exciting addition to that literature. The book is recommended as required reading in advanced courses and for professional management accounting programs. A fine volume."
