Globalization evokes mixed responses. It is praised for facilitating business, greater trade between nations and reducing poverty, and is also accused of causing job losses and homogenizing culture. While some nations cheer its benefits, others think of barriers to protect themselves. Yet, everyone agrees that it is a multidimensional and complex process that continuously reshapes our environment. Rather than wonder whether globalization is good or bad, it is important to understand how it impacts nations, organizations and individuals and be prepared to operate in that context.

Managerial Accounting for Managers, 3rd edition by Noreen/Brewer/Garrison is based on the market-leading managerial accounting solution, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen solution presents integrated and proven solutions designed to help attain course goals of student readiness, comprehension of content, and application of key concepts in the managerial accounting course, while addressing the needs of instructors who do not wish to teach the financial accounting-oriented content that is included in the Garrison solution. Of the three programs in the Garrison franchise (the Brewer solution, the Garrison solution, and the Noreen solution), the Noreen solution is the most pure management accounting content. The other two programs contain greater coverage of financial accounting

topics. Managerial Accounting for Managers 3e is geared towards professors who love Garrison's market-leading managerial accounting content but prefer to approach their course by eliminating the debits and credits coverage. The Noreen solution includes the managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization, however, the job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting—planning, control, and decision making. McGraw-Hill's Connect Accounting offers a complete digital solution combines all the great features of Connect Accounting, along with access to an online version of Managerial Accounting for Managers 3e, so that students can easily refer back to the text for review and guidance. This media rich eBook links directly to tutorials and online resources and offers additional functionality like taking notes and highlighting key passages for reviewing later. Contained within Connect Accounting is McGraw-Hill's adaptive learning system, LearnSmart, which is designed to help students learn faster, study more efficiently, and retain more knowledge for greater success. In addition, Interactive Presentations deliver learning objectives in an interactive environment, giving students access to course-critical content anytime, anywhere. Guided Examples provide students with narrated and animated, step-by-step walkthroughs of algorithmic versions of assigned exercises. Financial reporting practices differ widely between countries and this has far-reaching implications for multinational businesses. Over more than a century, there have been attempts to classify countries into groups by similarities of practices. With the recent spread of International Financial Reporting Standards, it might appear that classification is largely of historical interest, but this is not the case, for several reasons explained in this book. Christopher Nobes offers a critical analysis of the many previous accounting classifications, having drawn lessons from other fields of science and social science. Revised and updated to reflect the IFRS era, the book discusses how old classifications are reflected in today's international differences in practice under IFRS. It concludes with a discussion on the most useful classifications, and how classifications can still be relevant in the era of international standards. This book will be essential for academics, postgraduates and undergraduates in international accounting, accounting theory and to international accounting professionals. In this volume, we examine how the institutional environment affects entrepreneurial organizations, and vice-versa. This includes not only how the institutional environment constrains both founding processes and the type of organizations founded, but also how institutional dynamics construct new entrepreneurial opportunities, empower and facilitate action, and how entrepreneurs manipulate the institutional environment to serve their own ends. This institutional approach to entrepreneurship shifts attention away from the personal traits and backgrounds of individual entrepreneurs, and towards how institutions shape entrepreneurial opportunities and actions; how entrepreneurs navigate their cognitive, normative, and regulatory environments; and, how actors modify and build institutions to support new types of organizations. This extensively revised, fully updated, third edition includes a wide range of topics with a view to examining the increased challenges that will be faced by academicians, accounting and management professionals in the globally converging dynamic environment of accounting standards. The book is primarily intended as a text for postgraduate students of management (MBA) specializing in accounting and finance, postgraduate students of commerce (M.Com), financial studies, and international business (MIB). In addition, this text will be useful for professional courses offered by institutes such as the Institute of Chartered Accountants (ICAI), the Institute of Cost and

Works Accountants (ICWAI) and the Institute of Chartered Financial Analysts (ICFAI).

Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.
