The discovery of the mutilated corpse of a legal secretary in the garden of her employer's house presents an intriguing problem for the west Yorkshire police force. The absence of any motive or credible suspects make it seem that they are heading for a dead end. Unknown to the police, this murder was an act of revenge, carried out by an unsuspecting man, manipulated by a malevolent controller who has infiltrated his mind. For the controller, this act was retribution, but he soon escalates it to another level, regarding it as a game. He presents the police with yet another murder and as suspects line up, confusion reigns. He cares little about who suffers in this bizarre game. The outcome is uncertain and the reader is challenged to identify the real perpetrator. The first part of a trilogy, this book merely whets the appetite. Traditionally, research on human language has taken speech and written language as the only domains of investigation. However, there is now a wealth of empirical studies documenting visual aspects of language, ranging from rich studies of sign languages, which are self-contained visual language systems, to the field of gesture studies, which examines speech-associated gestures, facial expressions, and other bodily movements related to communicative expressions. But despite this large body of work, sign language and gestures are rarely treated together in theoretical discussions. This volume aims to remedy that by considering both types of visual language jointly in order to transcend (artificial) theoretical divides, and to arrive at a comprehensive account of the human language faculty. This collection seeks to pave the way for an inherently multimodal view of language, in which visible actions of the body play a crucial role. The 19 papers in this volume address four broad and overlapping topics: (1) the multimodal nature of language; (2) multimodal representation of meaning; (3) multimodal and multichannel prosody; and (4) acquisition and development of visual language in children and adults.

When the author's mother died he discovered over 200 letters in a shoe box that his father had written to her during their separation during World War II. Captain Lashley was stationed first at a hospital in England as a supply officer and then as the commander of a prisoner of war camp in France. During those months his letters tell of the events of his life. Some are boring and seem to be of little consequence, others are filled with emotional turmoil. Rene Lashley, his wife, has his fourth child while he is away, moves in with her mother and sister and raises her other three children. Kirk, the second son, is puzzled by what is happening, but continues doing those things a normal child does. The book is an effort to show the common, everyday concerns of all the family members in what is an unprecedented time in the life of the family and the world. The story is told through the voices of the soldier, the mom, and the child.
