This book reviews the prevalence and variants of consumer subsidies found in the developing world and the effectiveness of these subsidies for the poor. It places consumer subsidies in a broader social protection framework and compares them with poverty-focused programmes in other sectors using a common metric. It concludes that the most common subsidy instruments perform poorly in comparison with most other transfer mechanisms. Alternative consumption and connection subsidy mechanisms show more promise, especially when combined with complementary non-price approaches to making utility services accessible and affordable to poor households. The many factors contributing to those outcomes are dissected, identifying those that can be controlled and used to improve performance.

Despite notable socio-economic development in the Arab region, a deficit in democracy and political rights has continued to prevail. This book examines the major reasons underlying the persistence of this democracy deficit over the past decades and touches on the prospects for deepening the process of democratization in the Arab World. Contributions from major scholars in the region give a cross country analysis of economic development, political institutions and social factors, and the impact of oil wealth and regional wars, and present a model for democracy in the Arab world. Case studies are drawn from Algeria, Egypt, Iraq, Jordan, Lebanon, Syria, Sudan and the Gulf region, building on these cross-country analyses and probing beyond the modelâe(tm)s main global variables. Looking beyond the effect of oil and conflicts, the chapters illustrate how specific socio-political history of the country concerned, fear of fundamentalist groups, collusion with foreign powers and foreign interventions, and the co-option of the elites by the state contribute to these problems of democratization. Situating the democratic position of the Arab World in a global context, this book is an important contribution to the field of Middle Eastern politics, development studies, and studies on conflict and democracy.

This book was written for those who need to know how to collect, analyze and present data. It is meant to be a first course for practitioners, a book for private study or brush-up on statistics, and supplementary reading for general statistics classes. The book is untraditional, both with respect to the choice of topics and the presentation. The topics were determined by what is most useful for practical statistical work: even experienced statisticians will find new topics or new approaches to traditional topics. The presentation is as non-mathematical as possible. Mathematical formulae are presented only if they are necessary for calculations and/or add to readers' understanding. A sample survey is developed as a realistic example throughout the book, and many further examples are presented, which also use data spreadsheets from a supplementary website.

'Decentralization and Local Democracy in the World' constitutes a global reference on decentralization by presenting the

contemporary situation of local governments in all regions of the world. The report analyzes local authorities in each continent under three main themes: the evolution of territorial structures; responsibilities and power, management and finances; and local democracy. An additional chapter is dedicated to the governance of large metropolises, where rapid growth presents major challenges, in particular in the fast-developing countries of the South. This report also offers a comparative overview of the different realities concerning the state of decentralization, and how the basic indispensable mechansims for local democracy do, or do not exist in come countries. Relationships between the state and local authorities are evolving toward innovative forms of cooperation. In this context, the role of local authorities in the development of global policies is increasingly recognized. The first Global Observatory on Local Democracy and Decentralization (GOLD) Report is one of the main products of United Cities and Local Governments (UCLG). The GOLD Report is the first of what will be a triennial publication. UCLG represents and defends the interests of local governments on the world stage, regardless of the size of the communities they serve. Headquartered in Barcelona, the organization's stated mission is: To be the united voice and world advocate of democratic local self-government, promoting its values, objectives and interests, through cooperation between local governments, and within the wider international community.
