

Storia Di Un Leone Comune

Il Comune di Genova bollettino municipale mensile Storia della città di Viterbo mirabile e l'artificio creature animate e semoventi nel mito e nella tecnica degli antichi L'ERMA di BRETSCHNEIDER Storia naturale illustrata del regno animale tratta dalle opere dei più distinti e moderni naturalisti italiani e stranieri: Storia naturale dei mammiferi Piccola storia di Firenze dalla sua origine fino al principio della dominazione medicea Sotto il segno del leone Storia dell'Italia musulmana Gius. Laterza & Figli Spa

This book gives a comprehensive view of the strengths and limits of the interdisciplinary methods that work together to form the geohistorical approach to geographical and geological sciences. The geohistorical approach can be synthetically defined as a multi- and interdisciplinary approach that uses techniques and perspectives, mainly from geography, history, and natural sciences, to examine topics that inform the space-time knowledge of environment, territory, and landscape. The boundary between the application of physical and human science methods is large and hazy. This volume exists at this boundary and offers an approach that utilizes both historical data (from both physical and human records) and GIScience (e.g. GIS, cartography, GPS, remote sensing) to investigate the evolution of the environment, territory and landscape through both space and time. The first objective of this volume is to define the term geohistorical approach. An entire chapter focuses on a review of the main disciplines that connect geography and history, a review of the terms environment, territory, and landscape as objects of study of this approach, and the definition and importance of the geohistorical approach. The second goal is to describe the methods used in the geohistorical approach. Eight chapters present the key methods also using examples of applications from the international context, offering an awareness of the potentials, limitations and accuracy of each method, with particular focus on the integration of methods. The third goal is to provide case studies to demonstrate the use and integration of geohistorical methods from both original material and published research. A final chapter is dedicated to an interdisciplinary case study from the Venetian Plain (Italy), providing an example of the integration of almost all methods described in the book.

La penisola italiana è un molo naturale, un ponte e un'antica via di scorrimento tra Africa, Asia Minore ed Europa e ha generato nei secoli un'infinita vicenda di approdi, di razzie, d'insediamenti, di scontri e d'incontri. Amedeo Feniello racconta magistralmente come l'Italia, tra IX e XIV secolo, sia divenuta parte integrante d'un mondo di terra, d'acqua, di vele e di vento, dominato dalla presenza arabo-berbera. Storie di guerrieri, d'incursori, di principi, di mistici, di mercanti, di schiavi: dall'epica degli emiri e dei conquistatori normanni allo splendore delle corti di Ruggero e di Federico fino alla tragedia dei musulmani di Lucera. Franco Cardini Dura più di un sogno la presenza musulmana in Italia: quasi cinquecento anni, dall'inizio del IX secolo al 1300. Periodo in cui gran parte della Penisola diventa più Oriente che Occidente, più Africa e Asia che Europa, estrema propaggine, civilizzata ed evoluta, di un mondo che, tutto intero, andava da Cordova alle rive del Gange. Un'Italia per molti versi scomoda, dove tante generazioni vissero e pregarono lo stesso Dio da orizzonti diversi. Un mondo posto all'intersezione di culture, costumi, mentalità, credenze contrapposte, sempre in conflitto tra loro ma che, talvolta, convissero, alla ricerca di un comune equilibrio e di un rispettivo spazio di tolleranza e sopravvivenza.

Urbino, Rome, Florence, Milan, Ferrara... but also Mantua and Imola, Carpi and Saluzzo, Naples and Sicily: a collection of case studies on the Renaissance renewal of Italian court palaces from a comparative perspective.

<http://dx.doi.org/10.12946/gplh6><http://www.epubli.de/shop/buch/53894>"The spatiotemporal conjunction is a fundamental aspect of the juridical reflection on the historicity of law. Despite the fact that it seems to represent an issue directly connected with the question of where legal history is heading today, it still has not been the object of a focused inquiry. Against this background, the book's proposal consists in rethinking key confluences related to this problem in order to provide coordinates for a collective understanding and dialogue. The aim of this volume, however, is not to offer abstract methodological considerations, but rather to rely both on concrete studies, out of which a reflection on this conjunction emerges, as well as on the reconstruction of certain research lines featuring a spatiotemporal component. This analytical approach makes a contribution by providing some suggestions for the employment of space and time as coordinates for legal history. Indeed, contrary to those historiographical attitudes reflecting a monistic conception of space and time (as well as a Eurocentric approach), the book emphasises the need for a delocalized global perspective. In general terms, the essays collected in this book intend to take into account the multiplicity of the spatiotemporal confines, the flexibility of those instruments that serve to create chronologies and scenarios, as well as certain processes of adaptation of law to different times and into different spaces. The spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes, but also to achieve new and compelling interpretations of legal history. As far as the relationship between space and law is concerned, the book analyses experiences in which space operates as a determining factor of law, e.g. in terms of a field of action for law. Moreover, it outlines the attempted scales of spatiality in order to develop legal historical research. With reference to the connection between time and law, the volume sketches the possibility of considering the factor of time, not just as a descriptive tool, but as an ascriptive moment (quasi an inner feature) of a legal problem, thus making it possible to appreciate the synchronic aspects of the 'juridical experience'. As a whole, the volume aims to present spatiotemporality as a challenge for legal history. Indeed, reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline."

Questa pubblicazione nasce dall'esigenza di soddisfare un bisogno che le biblioteche e gli archivi del comune aderenti al CSBNO avvertivano da tempo: censire il materiale documentario e bibliografico di storia locale. Il volume riporta le informazioni che consentono di far emergere gli specifici nuclei contenutistici presenti nei fondi archivistici e bibliografici e si pone come strumento di consultazione indispensabile per valorizzarne il patrimonio storico-documentale. Ne emergono in modo chiaro temi istituzionali e personaggi che hanno contribuito ad elevare la storia locale del territorio.
