Lottie secretly knows there is a shark in the pool waiting to eat her, until her new walrus friend, Walter, helps her to conquer her fear.

While spending the summer in the Florida Keys with her grandfather, a retired marine biologist, ten-year-old Sarah has the opportunity to observe a variety of sharks and their behavior.

A fascinating story about the power of networking, connection, and mentorship Written as an engaging parable, Swim! How a Shark, a Suckerfish, and a Parasite Teach You Leadership, Mentoring, and Next Level Success brings to life real-world challenges (and their solutions) and presents them in simple, yet powerful terms. The book explores the vital importance of networking, explores the steps that lead to successful networking, and explains why we need it. Swim! dives deep into the concepts of mentorship and the power of human connection.

While too many business leaders spend their time obsessing about facts, figures, and the bottom line, it is more important for them to learn to manage relationships. Once attention shifts to relationships, businesses and careers can reach the next level of success. Written by a leading motivational speaker, this book offers ideas that can be applied to both personal and business life. Understand the importance of establishing habits and rituals Tap into the power of a positive mindset Discover the value of teamwork Learn to use intentional language about workplace culture Swim! is an entertaining book that highlights the significant concept of connecting and building relationships and includes the tools needed to become more self-aware about our roles and contributions in our industries.

Combining rich historical detail and a harrowing, pulse-pounding narrative, Close to Shore brilliantly re-creates the summer of 1916, when a rogue Great White shark attacked swimmers along the New Jersey shore, triggering mass hysteria and launching the most extensive shark hunt in history. In July 1916 a lone Great White left its usual deep-ocean habitat and headed in the direction of the New Jersey shoreline. There, near the towns of Beach Haven and Spring Lake--and, incredibly, a farming community eleven miles inland--the most ferocious and unpredictable of predators began a deadly rampage: the first shark attacks on swimmers in U.S. history. Capuzzo interweaves a vivid portrait of the era and meticulously drawn characters with chilling accounts of the shark's five attacks and the frenzied hunt that ensued. From the

unnerving inevitability of the first attack on the esteemed son of a prosperous Philadelphia physician to the spine-tingling moment when a farm boy swimming in Matawan Creek feels the sandpaper-like skin of the passing shark, *Close to Shore* is an undeniably gripping saga. Heightening the drama are stories of the resulting panic in the citizenry, press and politicians, and of colorful personalities such as Herman Oelrichs, a flamboyant millionaire who made a bet that a shark was no match for a man (and set out to prove it); Museum of Natural History ichthyologist John Treadwell Nichols, faced with the challenge of stopping a mythic sea creature about which little was known; and, most memorable, the rogue Great White itself moving through a world that couldn't conceive of either its destructive power or its moral right to destroy. Scrupulously researched and superbly written, *Close to Shore* brings to life a breathtaking, pivotal moment in American history. Masterfully written and suffused with fascinating period detail and insights into the science and behavior of sharks, *Close to Shore* recounts a breathtaking, pivotal moment in American history with startling immediacy. Individuals are not racist by intent; they are racist by culture, heritage, and education. If I were to ask anyone if they were a racist, they would immediately deny it as a possibility. They would espouse their wonderful humanitarian acts, or friends of color that would support an embracement of diversity that would make us all proud. The truth, I have never met a racist that knew they were racist. Even when educated as to what they have done, they would go to their grave stating that under no circumstances should I ever consider them a racist. This book is designed to tell you that it does not matter how many racists you meet in the office, you can still be successful. This book is designed to help you identify, and cope, and achieve success in those corporate environments that are not well. It provides you with advice on how to “swim with sharks in dark water.” This book will help you to use your “Spidey senses,” to trust your gut, to identify when you are working on a plantation, how to cope until you can leave. Oh, by the way, I need to tell you that you do not have the power at any time on any day to fix the plantation, without permanently damaging your career. The people who have fixed these issues have sacrificed their career, possibly their livelihood to ensure that we do not experience what they did. They shall always be the nameless heroes of our generation. We will always be indebted to those individuals who spoke up and lost their livelihood as a result. You need to understand that making a difference has a cost, and those that have done this have paid dearly.

Powerful and mysterious, sharks inspire both fascination and fear. Worldwide, oceans are home to some five-hundred species, and of those, fifty-six are known to reside in or pass through the waters off the coast of both North and South Carolina. At any given time, waders, swimmers, and surfers enjoying these waters are frequently within just one-hundred feet of a shark. While it's unnerving to know that sharks often swim just below the surface in the shallows, W. Clay Creswell, a shark-bite investigator for the Shark Research Institute's Global Shark Attack File, explains that attacks on humans are extremely rare. In 2019 the International Shark Attack File confirmed sixty-four unprovoked attacks on humans, including three in North Carolina and one in South Carolina. While acknowledging that they pose real dangers to humans, Creswell believes the fear of sharks is greatly exaggerated. During his sixteen-year association with the Shark Research Institute, he has investigated more than one hundred shark-related incidents and has maintained a database of all shark-human encounters along the Carolina coastlines back to 1817. Creswell uses this data to expose the truth and history of this often-sensationalized topic. Beyond the statistics related to attacks in the Carolina waters, *Sharks in the Shallows* offers a history of shark-human interactions and an introduction to the world of shark attacks. Creswell details the conditions that increase a person's chances of an encounter, profiles the three species most often involved in attacks, and reveals the months and time of day with the highest probability of an encounter. With a better understanding of sharks' responses to their environment, and what motivates them to

attack humans, he hopes people will develop a greater appreciation of the invaluable role sharks play in our marine environment.

Sharyn and Charlotte prepare for their beach vacation by taking swimming lessons at a new marine water pool, but they are frightened when an angry escaped shark gets into the pool and tries to bite Sharyn.

"Describes swimming with sharks for scientific study and as part of a tour group, the dangers involved, the gear needed, and what scientists have learned from their quests"--Provided by publisher.

Before Eugenie Clark's groundbreaking research, most people thought sharks were vicious, blood-thirsty killers. From the first time she saw a shark in an aquarium, Japanese-American Eugenie was enthralled. Instead of frightening and ferocious eating machines, she saw sleek, graceful fish gliding through the water. After she became a scientist—an unexpected career path for a woman in the 1940s—she began taking research dives and training sharks, earning her the nickname "The Shark Lady."

Georgie Codd is scared of fish. Really, really scared. Even on dry land there's no escape: Georgie sees sharks in the dining room, squid tentacles in the street, has nightmares of being stranded at sea. Granny Codd understands. She has spent her life beside the water, but won't so much as paddle in it. Georgie's boyfriend is supportive, too, even when she decides that the answer to overcoming this fear lies in travelling to Thailand, learning to dive, and swimming with the biggest fish in the world: the massive, mighty whale shark. Could this immersive therapy actually work? There's only one way to find out. An anxious Georgie quits her job, leaves her life behind, and plunges into a realm of strange creatures, hidden depths, and intrepid diving adventurers. But as her quest expands across the oceans, her shark remains elusive, and everything else starts to fall apart around her. On this journey that veers towards death and destruction, Georgie must not only track down her shark, but find her way back to the surface.

WINNER OF THE 2020 PEN/HEMINGWAY AWARD FOR DEBUT NOVEL. One of Barack Obama's Favorite Books of 2020. A finalist for the 2020 PEN/Jean Stein Book Award. Named one of the Best Books of 2020 by the New York Times (#30), the Guardian, the Boston Globe, Oprah Magazine, Kirkus Reviews, BBC Culture, Good Housekeeping, LitHub, Spectrum Culture, Third Place Books, and Powell's Books. *Sharks in the Time of Saviors* is a groundbreaking debut novel that folds the legends of Hawaiian gods into an engrossing family saga; a story of exile and the pursuit of salvation from Kawai Strong Washburn. "Old myths clash with new realities, love is in a ride or die with grief, faith rubs hard against magic, and comic flips with tragic so much they meld into something new. All told with daredevil lyricism to burn. A ferocious debut." —MARLON JAMES, author of *Black Leopard, Red Wolf* "So good it hurts and hurts to where it heals. It is revelatory and unputdownable. Washburn is an extraordinarily brilliant new talent." —TOMMY ORANGE, author of *There There* Named one of the most anticipated novels for 2020 by the Guardian and Paste Magazine. One of Book Riot's Best Books to Give as Gifts in 2020. In 1995 Kailua-Kona, Hawaii, on a rare family vacation, seven-year-old Nainoa Flores falls overboard a cruise ship into the Pacific Ocean. When a shiver of sharks appears in the water, everyone fears for the worst. But instead, Noa is gingerly delivered to his mother in the jaws of a shark, marking his story as the stuff of legends. Nainoa's family, struggling amidst the collapse of the sugarcane industry, hails his rescue as a sign of favor from ancient Hawaiian gods—a belief that appears validated after he exhibits puzzling new abilities. But as time passes, this supposed divine favor begins to drive the family apart: Nainoa, working now as a paramedic on the streets of Portland, struggles to fathom the full measure of his expanding abilities; further north in Washington, his older brother Dean hurtles into the world of elite college athletics, obsessed with wealth and fame; while in California, risk-obsessed younger sister Kauai navigates an unforgiving academic workload in

an attempt to forge her independence from the family's legacy. When supernatural events revisit the Flores family in Hawai'i—with tragic consequences—they are all forced to reckon with the bonds of family, the meaning of heritage, and the cost of survival.

Marine biologist Pete Klimley swims with the sharks. He was one of the first scientists to free-dive among sharks, and he has spent nearly thirty years studying shark behavior, sometimes swimming in schools of several hundred sharks. From his firsthand observations he has learned that sharks are not the vicious man-eaters that we imagine, but fascinating animals with complex behaviors. Most people who think of sharks at all think immediately of great white sharks. But there are more than four hundred species of shark. Dr. Klimley has studied several species, most notably the great white and the hammerhead. (He describes the great white as the athlete among sharks, and the hammerhead as the Ph.D. of the shark world.) In *The Secret Life of Sharks* Dr. Klimley reveals the significant discoveries he made about hammerhead navigation and great white eating habits. By studying hammerheads gathered around underwater seamounts, Dr. Klimley learned that hammerheads rely on sophisticated tracking of ocean-floor magnetism to navigate. His long-term study of great white sharks off the California coast demonstrated that these huge sharks prefer to eat seals and sea lions because of the energy contained in their fatty bodies. They are selective eaters, not the man-eaters we expect, and they sometimes go weeks between meals. But Dr. Klimley did observe a ritualized behavior that great whites practice in order to avoid deadly disputes over prey that one shark has captured and another wants. Although we have learned a great deal about shark behavior, says Dr. Klimley, there is much that we do not know. Unfortunately we are destroying these magnificent creatures of the deep through overfishing and degradation of the oceans. Already some populations of sharks have declined steeply. Vividly written by one of the foremost authorities on sharks, *The Secret Life of Sharks* is a fascinating account of some of the world's most magnificent animals.

An in-depth guide to sharks includes information on where they live, how they eat, the challenges they face, and whether or not certain species pose a danger to humans.

Many experts call the bull shark the most dangerous shark around. This ill-tempered aggressor swims the same shallow waters as humans. It can even travel up rivers for hundreds of miles.

Discover the head-butting rage of the bull shark in this informative title.

Peyton is willing to follow fellow cheerleader Lexie's lead in order to fit in, but when Lexie begins tormenting the new girl at school, Peyton questions whether achieving popularity is worth the price of cruelty.

One of New York Times' Twelve Books for Feminist Boys and Girls! This is the story of a woman who dared to dive, defy, discover, and inspire. This is the story of Shark Lady. One of the best science picture books for children, *Shark Lady* is a must for both teachers and parents alike! An Amazon Best Book of the Month Named a Best Children's Book of 2017 by Parents magazine Eugenie Clark fell in love with sharks from the first moment she saw them at the aquarium. She couldn't imagine anything more exciting than studying these graceful creatures. But Eugenie quickly discovered that many people believed sharks to be ugly and scary—and they didn't think women should be scientists. Determined to prove them wrong, Eugenie devoted her life to learning about sharks. After earning several college degrees and making countless discoveries, Eugenie wrote herself into the history of science, earning the nickname "Shark Lady." Through her accomplishments, she taught the world that sharks were to be admired rather than feared and that women can do anything they set their minds to. An inspiring

story by critically acclaimed zoologist Jess Keating about finding the strength to discover truths that others aren't daring enough to see. Includes a timeline of Eugenie's life and many fin-tastic shark facts! The perfect choice for parents looking for: Books about sharks Inspiring nonfiction narrative books Role model books for girls and boys Kids STEM books

When the doctor gets frustrated by the riotous play of the five little sharks, he decides to send them packing, yet after he does so, the neighborhood becomes all too quiet as the big blue ocean simply appears all too empty without them. This straight-from-the-hip handbook by bestselling author and self-made millionaire Harvey Mackay spells out the path to success for readers everywhere. They will learn how to: Outsell by getting appointments with people who absolutely, positively do not want to see you, and then making them glad they said "yes!" Outmanage by arming yourself with information on prospects, customers, and competitors that the CIA would envy - using a system called the "Mackay 66." Outmotivate by using his insights to help yourself or your kids join the ranks of Amercia's one million millionaires. Outnegotiate by knowing when to "smile and say no" and when to "send in the clones." This one-of-a-kind book by a businessman who's seen it all and done it all has sold almost 2 million copies, and is the essential roadmap for everyone on the path to success.

If you were stranded in the open ocean, the oceanic whitetip shark would likely be the first to greet you. This fish prefers to haunt the deep, open waters of the ocean, where it jumps on any potential food source. Young readers will learn why this lesser-known shark deserves the same infamy as the greats.

Animals can be cute ... and cruel! Read Seb's journal for some truly terrifying shark secrets. Meet Snow White the great white shark and get really close to her huge, scissor-sharp jaws. Relive the drama, dangers and disgusting details as you find out: if toilets are more dangerous than sharks; how to escape from a shark; how you tickle a shark; what a shark's favorite color is.

It's reading, writing, and reconnaissance for Adam Sharp and the other IM-8 agents when they go back to spy school. But even the hallowed halls of learning aren't safe from evil. Someone is leaking IM-8 secrets! Could there be a spy at spy school? Only Adam Sharp can find out!

The must-read summary of Harvey Mackay's book "Swim with the Sharks without Being Eaten Alive: Outsell, Outmanage, Outmotivate and Outnegotiate Your Competition". This complete summary of the ideas from Harvey Mackay's book "Swim with the Sharks Without Being Eaten Alive" is based on a simple, but convincing, formula: Determination + Goal-Setting + Concentration = Success. In his book, the author acknowledges that the execution of this formula is more difficult, and requires perseverance, but shows that your chances of success are higher if you follow some logical strategies. This summary provides a crash course on the most vital business elements, such as management, negotiation and salesmanship and shows the reader how to set up value for a product, how to inject your own personality into business and how to deal with the tough

prospect. Added-value of this summary: • Save time • Understand key concepts • Expand your knowledge To learn more, read "Swim with the Sharks Without Being Eaten Alive" and find out how to always come out on top.

Swimming with Sharks Rita's times aren't fast enough to swim for the Sharks with her friends. To improve she must learn flip turns, but every time she tries, she gets water up her nose! Jazz has an idea that might be the key to Rita's success, but what if Rita comes in first on a slower team? Would she rather win or be with her friends? Or is there another way for Rita to swim with the Sharks? Track Attack Jazz loves being on a track team where she sprints fast as a lightning bolt. Her dad loves that she's on the team, too. He's her biggest fan—maybe too big a fan. He argues with the coach, yells at the ref, and screams his head off at every meet. Jazz loves to run, but can she focus on the race while Dad is having a track attack?

A thrilling survival story from Michael Northrop, the acclaimed author of TRAPPED. He couldn't sleep. That's how it all started. When Davey wakes, just as the sun is rising, he can't wait to slip out of the crammed hotel room he's sharing with his family. Leave it to his parents and kid brother to waste an entire day of vacation sleeping in! Davey heads straight for the beach, book and glasses in hand, not bothering to leave a note. As the sparkling ocean entices him, he decides to test the water, never mind that "No Swimming" sign. But as the waves pull him farther from shore, Davey finds himself surrounded by water -- and something else, too. Something circling below the surface, watching, waiting. It's just a matter of time. Michael Northrop is the New York Times bestselling author of TombQuest, an epic book and game adventure series featuring the magic of ancient Egypt. He is also the author of Trapped, an Indie Next List Selection, and Plunked, a New York Public Library best book of the year and an NPR Backseat Book Club selection. An editor at Sports Illustrated Kids for many years, he now writes full-time from his home in New York City. Learn more at www.michaelnorthrop.net.

"Dive into learning about goblin sharks with diagrams, strong photography, and fun hi/lo text"--

Lemon sharks are sneaky stalkers. They blend in with the sandy ocean bottom for camouflage! In this book, swim along with several lemon sharks.

Describes the inner and outer workings of sharks, including their diet, anatomy, and reproduction.

In her own life and through her work with others, Victoria Castle has repeatedly encountered the tragic theme of "not-enough-ness"--both the "I am not enough" and "there is not enough" varieties--and witnessed how it cripples even the most buoyant and passionate people among us. Castle calls this blight the Trance of Scarcity. It shows up in a hundred personalized versions, but the results are always the same. Instead of expressing our brilliance and creativity, we show the world only the by-products of oppression, isolation, exclusion, and defeat. We spend our time lamenting the way things are, justifying all the reasons they can't be different. In this inspiring and very personal book, Castle shows that there is life on the other side of the Trance -- a life characterized by vitality, fulfillment, and efficacy. She shares specific practices you can use to change your story--to identify and interrupt negative, constraining patterns and replace them with more positive and liberating ones to achieve greater freedom, fulfillment, and satisfaction. With compassion and surprising humor, *The Trance of Scarcity* will help you embody abundance as your way of being. Once you do, you'll be more inspired and more inspiring, you'll build bridges to replace dead ends, and you'll easily arrive at solutions to issues that once overwhelmed you. Having broken free from the Trance of Scarcity, you'll be able to live a life where ease and plenty emanate from you as naturally as your breath.

2017 Amelia Bloomer List, Early Readers Nonfiction Before Eugenie Clark's groundbreaking research, most people thought sharks were vicious, blood-thirsty killers. From the first time she saw a shark in an aquarium, Japanese-American Eugenie was enthralled. Instead of frightening and ferocious eating machines, she saw sleek, graceful fish gliding through the water. After she became a scientist—an unexpected career path for a woman in the 1940s—she began taking research dives and training sharks, earning her the nickname "The Shark Lady." *How to Swim with the Sharks: A Survival Guide for Leadership in Diverse Environments*, provides real-life vignettes of personal and professional triumphs. Each story offers tried and proven leadership techniques for use in challenging business or personal environments. The book also addresses management styles useful for building and managing teams. While the book covers situations in professional environments, it could easily be adapted to situations in community organizations or in schools. Unique to business management literature, this book covers a key element often overlooked in other books: office politics. The book is written for those who, despite being highly skilled and qualified, encounter setbacks due to office power dynamics. The book is organized in a very easy-to-read format. Each chapter begins with a dilemma, followed by a strategy, advantage and reflection to help one tackle the dilemma. Then, the chapter concludes with brief "take-away" tips that will help readers

successfully swim with the sharks.
