Sterile Drug Products: Formulation, Packaging, Manufacturing, and Quality teaches the basic principles of the development and manufacture of high quality sterile dosage forms. The author has 38 years of experience in the development and manufacture of sterile dosage forms including solutions, suspensions, ophthalmics and freeze dried products. This book is based on the courses he has delivered for over three decades, to over 3000 participants, and is intended to remain relevant for the indefinite future even as new technologies and new applications of old technologies become common. This is an ideal reference book for those working directly and indirectly with sterile dosage forms, be it product development (formulation, package, process, analytical), manufacturing, quality control, quality assurance, regulatory, purchasing, or project management. This book is also intended as an educational resource for the pharmaceutical and biopharmaceutical industry and pharmacy schools, providing basic knowledge and principles in four main areas of parenteral science and technology: Product development, including formulation, packaging, and process development. Manufacturing, including basic teaching on all the primary unit operations involved in preparation of sterile products and the underlying importance of contamination control. The AAMI recommended practice, Comprehensive guide to steam sterilization and sterility assurance in health care facilities, is a

breakthrough standard in terms of its scope. AAMI has updated ST79 with the release of ST79:2010/A4:2013. Of particular importance, A4:2013 provides four new figures demonstrating the wrapping of items for steam sterilization and adds an annex focused on Moisture assessment. As of Oct. 25, 2013, purchasers of ST79 will receive ANSI/AAMI ST79:2010 and A1:2010 and A2:2011 and A3:2012 and A4:2014 as a single consolidated document. Among other changes from the 2006 edition of ST79, this revised and expanded second edition of ST79 includes guidance on the use and application of Class 6 emulating indicators, a chemical monitoring device fairly new to the United States. Because ST79 essentially consolidates five AAMI steam sterilization standards (whose content was reviewed and updated to reflect current good practice prior to being incorporated into ST79), it truly is a comprehensive guideline for all steam sterilization activities in healthcare facilities, regardless of the size of the sterilizer or the size of the facility, and provides a resource for all healthcare personnel who use steam for sterilization.

The first edition of Sterile Processing, Invisible Culture was an instant hit among techs, as it peered behind the scenes into the hidden world of a healthcare career that has long been past due to receive its well-deserved recognition. Sterile processing techs the world over have been wondering why, even in the 21st century, with robotic and laparoscopic instruments taking center stage in the surgical theater, the average lay person STILL has no idea who is responsible for preparing all of the high-tech gadgetry used in surgery or even how it is prepared. For decades the job of cleaning and sterilizing medical instruments has been so "invisible" as to almost seem like some type of covert operation. Well it is not! Sterile Processing is a legitimate career utilizing elite members of surgical teams from all around the world to make surgeries safe for every patient who goes under the knife. Sterile Processing, Invisible Culture "Reprocessed" exposes this ever-expanding career from the inside out, just as the original version did but without the photos and personal names that some readers found offensive and unwarranted. Basics of SPD Textbook covers the foundations of the SPD profession, with easy to ready text. Each chapter builds upon the next, so all of the material relates. The Basics of SPD Workbook reinforces the readings in the textbook.

"Would You Have Surgery Where You Work?" I've asked this question numerous times in various facilities across the country. Each time only about 3% of the staff will raise their hands. The other 97% of the hands remain lowered. This is more telling (and more frightening) than the best surveyor's report! We are so much better than 3%. No one comes to a hospital to try and get worse. They come to get better. CSPD gets to help and be a part of that. This book is to help CSPD leaders with tools, tips, and a few stories to help along the way!
