The book follows the two children as they embark on an adventure, which begins with the discovery of a hidden witch's haven in a graveyard and Jordan's first encounter with the spirit world - but by know means the first for Sebastian. Then a haunted observatory on the outskirts of town yields a clue - a piece of an intriguing map leading to, what they believe to be, hidden treasure. After collecting the rest of the clues from around the town, Jordan and Sebastian search for the treasure, but instead of rubies, emeralds and gold doubloons, they find themselves lead to a doorway into another world, called the Phantom Realm.

This book explores the concept of incongruent film music, challenging the idea that this label only describes music that is inappropriate or misfitting for a film's images and narrative. Defining incongruence as a lack of shared properties in the audiovisual relationship, this study examines various types of incongruence between a film and its music and considers the active role that it can play in the construction of a film's meaning and influencing

audience response. Synthesising findings from research in the psychology of music in multimedia, as well as from ideas sourced in semiotics, film music, and poststructuralist theory, this interdisciplinary book provides a holistic perspective that reflects the complexity of moments of film-music incongruence. With case studies including well-known films such as *Gladiator* and *The Shawshank Redemption*, this book combines scene analysis and empirical audience reception tests to emphasise the subjectivity, context-dependency, and multi-dimensionality inherent in identifying and interpreting incongruent film music.

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

This book gives an overview of the existing self-healing nanotextured vascular approaches. It describes the healing agents used in engineering self-healing materials as well as the fundamental physicochemical phenomena accompanying self-healing. This book also addresses the different fabrication methods used to form core-shell nanofiber mats. The fundamental theoretical aspects of fracture mechanics are outlined. A brief theoretical description of cracks in brittle elastic materials is given and the Griffith approach is introduced. The fracture toughness is described, including viscoelastic effects. Critical (catastrophic) and subcritical (fatigue) cracks and their growth are also described theoretically. The adhesion and cohesion energies are introduced as well, and the theory of the blister test for the two limiting cases of stiff and soft materials is developed. In addition, the effect of non-self-healing nanofiber mats on the toughening of ply surfaces in composites is discussed. The book also presents a brief description of the electrochemical theory of corrosion crack growth. All the above-mentioned phenomena are relevant in the context of self-healing materials.

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the

car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

Current energy consumption mainly depends on fossil fuels that are limited and can cause environmental issues such as greenhouse gas emissions and global warming. These factors have stimulated the search for alternate, clean, and renewable energy sources. Solar cells are some of the most promising clean and readily available energy sources. Plus, the successful utilization of solar energy can help reduce the dependence on fossil fuels. Recently, organic solar cells have gained extensive attention as a next-generation photovoltaic technology due to their light weight, mechanical

The collection is sourced from the remarkable library of Victor Amadeus, whose Castle Corvey collection was one of the most spectacular discoveries of the late 1970s. The Corvey Collection comprises one of the most important collections of Romantic era writing in existence anywhere -- including fiction, short prose, dramatic works, poetry, and more -- with a focus on especially difficult-to-find works by lesser-known, historically neglected writers. The Corvey library was built during the last half of the 19th century by Victor and his wife Elise, both bibliophiles with varied interests. The collection thus contains everything from novels and short stories to belles lettres and more populist works, and includes many exceedingly rare works not available in any other collection from the period. These invaluable, sometimes previously unknown works are of particular interest to scholars and researchers. In the early 1990s, Kelly Hayes, a friendly fifteen-year-old, moves from New York City to Connecticut with his recently divorced mother in search of a finding a simpler and safer life in the lovely town of Riverview. But when the school year begins, students, teachers, and even the principal consider him an outsider and a troublemaker. Bullied and beaten by the Jocks and the Preps, Kelly finds friendship with the other outcasts in the school but gets caught up in a world far more complex and dangerous than his urban upbringing had prepared him for. From the dilapidated confines of State Hospital, Kelly relates to his psychiatrist the raucous and riotous events of the last year that changed him from a typical high school kid to a rebellious youth, a problem who the school and the community helped to create.

An action-packed series-starter perfect for fans of *The Heroine Complex* and *Not Your Sidekick*. “I didn’t know how much I needed this brave, thrilling book until it rocked my world. Dreadnought is the superhero adventure we all need right now.”—Charlie Jane Anders, author of *All the Birds in the Sky*

Danny Tozer has a problem: she just inherited the powers of Dreadnought, the world’s greatest superhero. Until Dreadnought fell out of the sky and died right in front of her, Danny was trying to keep people from finding out she’s transgender. But before he expired, Dreadnought passed his mantle to her, and those secondhand superpowers transformed Danny’s body into what she’s always thought it should be. Now there’s no hiding that she’s a girl. It should be the happiest time of her life, but Danny’s first weeks finally living in a body that fits her are more difficult and complicated than she could have imagined. Between her father’s dangerous obsession with “curing” her girlhood, her best friend suddenly acting like he’s entitled to date her, and her fellow superheroes arguing over her place in their ranks, Danny feels like she’s in over her head. She doesn’t have time to adjust. Dreadnought’s murderer—a cyborg named Utopia—still haunts the streets of New Port City, threatening destruction. If Danny can’t sort through the confusion of coming out, master her powers, and stop Utopia in time, humanity faces extinction.
