This handbook presents an authoritative account of the development of movements, thoughts and policies of OBCs (Other Backward Classes) in India. Despite the adoption of egalitarian principles in the Indian Constitution, caste inequalities, discrimination and exclusionary practices against people from backward classes and other lower castes continue to haunt them in contemporary India. A comprehensive work on the politics of identity and plurality of experiences of OBCs in India, this handbook: — Features in-depth research by eminent scholars on the Other Backward Classes (OBC) social and political thought, OBC movements and OBC development and policy making. — Discusses the life, ideologies and pioneering contributions by Gautam Buddha, Sant Kabir, Jotirao Phule, Savitribai Phule, Shahu Maharaj, Narayana Guru, B.R. Ambedkar, Ram Manohar Lohia, and E V Ramasamy Periyar and leading social reform movements. — Examines OBC issues with case studies from various Indian states to look at issues of pre- and post-Mandal India; backward caste movements; and reclamation of the Bahujan legacy. — Critiques public policies and programs for the development of OBCs in India. — Reviews the status of Muslim OBCs in India and of the invisibilized nomadic communities. — Reviews the impact of globalization on the economically backward lower castes and the impact of development initiatives for the excluded people. The first of its kind, this handbook will be essential reading for scholars and researchers of exclusion and discrimination studies, diversity and inclusion studies, Global South studies, affirmative action, sociology, Indian political history, Dalit studies, political sociology, public policy, development studies and political studies.

Drawing on empirical, interdisciplinary research, this book presents a critical review of some of the major issues that are of interest to researchers, policymakers and planners in developing as well as advanced countries, including specifically in India. It provides an in-depth review of some of the major development policy issues in education in general, and in India in particular, over the past 2-3 decades. Besides presenting an overview of the educational developments in India that reflects issues such as growth, equity, efficiency, foreign aid, decentralization, center-state relations, financing, and cost recovery, the book puts forward in-depth analyses of education poverty, interrelations between education and poverty, low level of outcomes in elementary education, effects of structural adjustment policies and approaches on education, south-south cooperation, etc. It also critically discusses changes in policies relating to financing higher education, external assistance for education, and how the growth of private higher education is affecting society at large. The dichotomy between public policy and action is also highlighted in many chapters. On the whole, while the importance of education is being increasingly recognized, the state does not seem to be as willing to foot the bill for education as the households and even the private sector. Occasionally contrasting with international evidence on, for example, financing higher education, private higher education, or the effects of neo-liberal policies, the book offers an interesting read for a wider audience.
