The new edition of this landmark volume emphasizes the dynamic, interactional, and reflexive dimensions of the research interview. Contributors highlight the myriad dimensions of complexity that are emerging as researchers increasingly frame the interview as a communicative opportunity as much as a data-gathering format. The book begins with the history and conceptual transformations of the interview, which is followed by chapters that discuss the main components of interview practice. Taken together, the contributions to *The SAGE Handbook of Interview Research: The Complexity of the Craft* encourage readers simultaneously to learn the frameworks and technologies of interviewing and to reflect on the epistemological foundations of the interview craft.

medical personnel involved in providing care for critically injured patients. Communication, effective first aid, and on time transportation to a health center play a major role in improving quality of care for critically injured patients. Using life experience examples, participants in the study emphasized the importance of each factor on the delivery of quality care for critically injured patients. Recommendations based on the study findings included two main categories. The first category illustrated recommendations to stakeholders, and the second category reflected recommendations for further study. Stakeholders in this study included healthcare leaders in Afghanistan, healthcare professionals involved in providing health care in Afghanistan, and local people in Afghanistan. The modified van Kaam method in the qualitative phenomenological study involved conducting semistructured interviews, which were audio-taped and transcribed. The rationale for using the phenomenological approach in the qualitative study was to describe in-depth experiences of health care professionals. Moustakas (1994) modified van Kaam method explored the lived experiences and perceptions of 17 doctors and nurses relating to emergency trauma care for critically injured patients. Data analysis revealed important factors that could enhance the quality of prehospital care for civilian casualties of landmine and unexploded ordnance (UXO) blast injuries in

I wanted to create a self-help book which would enable business analysts doing well in the interviews and getting their dream jobs. This book has four sections as describes below. Section I deals with general questions. These questions give the interviewer(s) the first impression about your confidence, composure, and basic communication skills. This section includes General questions about you and your profile as well as General BA questions about the role and the projects. Second II - Business Analysis core skills has questions relating to Requirements elicitation, techniques, UML modelling, Requirements specifications documentation (Business Analysis core skills). It covers various aspects of requirements, Use cases, process diagrams, SRS and its elements, prioritization, elicitation, verification, and validation etc. It is also the longest section of the book. Section III deals with Agile, SCRUM and user stories. There are advance questions relating to personas and application usability as well. Section IV includes some additional questions on Business analysis. Section V deals with the situation / scenario-based questions. These questions are asked in the BA interviews regularly. This book is about coding interview questions from software and Internet companies. It covers five key factors which determine performance of candidates: (1) the basics of programming languages, data structures and algorithms, (2) approaches to writing code with high quality, (3) tips to solve difficult problems, (4) methods to optimize code, (5) soft skills required in interviews. The basics of languages, algorithms and data structures are discussed as well as questions that explore how to write robust solutions after breaking down problems into manageable pieces. It also includes examples to focus on modeling and creative problem solving. Interview questions from the most popular companies in the IT industry are taken as examples to illustrate the five factors above. Besides solutions, it contains detailed analysis, how interviewers evaluate solutions, as well as why they like or dislike them. The author makes clever use of the fact that interviewees will have limited time to program meaningful solutions which in turn, limits the options an interviewer has. So the author covers those bases. Readers will improve their interview performance after reading this book. It will be

beneficial for them even after they get offers, because its topics, such as approaches to analyzing difficult problems, writing robust code and optimizing, are all essential for high-performing coders.

With concerns about energy security and new advances in renewable energy resources, the energy industry is sure to be one of the most exciting and important career fields in the 21st century.

The early 1970's might have been the most appropriate time in America's history to set up a radio news network for and about Blacks in the United States, more appropriate than any other time in the 20th century. The riots of the 1960's, which had been installed as a legitimate dynamic of the Civil Rights Movement, were for the most part a thing of the past. The urban pockets of disfranchised citizens were no longer ablaze but the ashes were still smoldering. And everybody from the President to the Pope, and those in between, knew this condition could not be trusted to remain status quo without progressive maintenance. Answering this call to duty was two young and ambitious black men in New York City, the headquarters location of all the major broadcast-networks at that time. Eugene Jackson, an engineer with an MBA and Sydney Small, a business major along with, Del Raycee, a consummate veteran from the grandfather of all radio networks, Mutual Broadcasting, formed the National Black Network under a parent company

called Unity Broadcasting, Inc. Can't get HERE from THERE picks up the story from the initial broadcast, July 1973. This is where the author joined the group and served as chief operator of the broadcast division through its demise nearly twenty years later. Among the pertinent discussions undertaken in the book are: The "benign neglect" posture maintained by major national advertisers and their ad agencies with regards to entering contracts with black owned media companies. The struggles to have white owners of radio stations programmed for black audiences understand the need for news of a different approach. (Blacks owned scarcely more than ten radio stations when the network was formed) Profiles of the network's starting line up of personnel and its creative approach to programming for the target audience. The pros and cons of in-house politics and their long range affect on the company and the ownership team. And the scarcity of trained personnel as was needed for this project. Special projects which included the participation of celebrities such as Ossie Davis, Ruby Dee, Bill Cosby and political luminaries like President Jimmy Carter, Congressman Andy Young, Rev. Jesse Jackson, Presidential Cabinet Member Arthur Fletcher, et al. The First Edition of *InterViews* has provided students and professionals in a wide variety of disciplines with the “whys” and “hows” of research interviewing, preparing students for learning interviewing by doing interviews and by studying examples of best practice. The thoroughly revised Second Edition retains its original seven-stage structure, continuing to focus on the practical, epistemological, and ethical issues involved with interviewing. Authors Steinar Kvale and Svend Brinkmann also include coverage of newer developments in qualitative interviewing, discussion of interviewing as a craft, and a new chapter on linguistic modes of interview analysis. Practical and conceptual assignments, as well as new “tool boxes,” provide students with the means to dig deeper into the material presented and achieve a more meaningful level of understanding.

Praise for the previous edition: "I think this is one of the most in-depth treatments of the interview process that I have seen. The foundational aspects of business ethics are predicated on how effectively a leader can enable significant change in their organizations while still retaining the most valuable aspects of its culture, people, processes and systems. The intent of this research is to analyze how leadership set the foundation for ongoing ethical compliance. This book examines the phenomenon of unsubmitted and untested sexual assault kits (SAKs). Beginning with an analysis of the background of the study, it examines feminist theory, functionalism, and resource dependence theory in relation to the phenomenon. The book highlights the existence of scholarly literature on the topic of sexual assault and what sexual assault encompasses, leading to the problem of unsubmitted and untested SAKs. Sexual assault is a global problem involving women and college students. Unfortunately, there are 400,000 SAKs nationwide in the US that remain unsubmitted or untested, therefore indicating serious gaps in the criminal justice system. The book shows the need for stakeholders who have an interest in the topic to collectively engage to acknowledge the systemic gaps, and provide resolution so that officials properly utilize SAKs to apprehend and empower victims to live healthy and functional lives. It recognizes and portrays the results of the study and suggests recommendation for future research. The book will be an instrumental tool for law enforcement officers, sexual assault detectives, forensic scientists, and sexual assault nurse

Interviews are a frequent and important part of empirical research in political science, but graduate programs rarely offer discipline-specific training in selecting interviewees, conducting interviews, and using the data thus collected. *Interview Research in Political Science* addresses this vital need, offering hard-won advice for both graduate students and faculty members. The contributors to this book have worked in a variety of field locations and settings and have interviewed a wide array of informants, from government officials to members of rebel movements and victims of wartime violence, from lobbyists and corporate executives to workers and trade unionists. The authors encourage scholars from all subfields of political science to use interviews in their research, and they provide a set of lessons and tools for doing so. The book addresses how to construct a sample of interviewees; how to collect and report interview data; and how to address ethical considerations and the Institutional Review Board process. Other chapters discuss how to link interview-based evidence with causal claims; how to use proxy interviews or an interpreter to improve access; and how to structure interview questions. Over the past decade, the call for evidence-based management has been on the rise. Managers have become increasingly skeptical of advice that is based solely on anecdotes, otherwise known as the "art of management"; they demand, instead, proof that the management practices espoused by the authors in the field are truly effective. *Becoming the Evidence-Based Manager* delivers the goods, covering a wide range of critical management skills, such as hiring, inspiring, training, developing, motivating and coaching. Readers are rewarded with a thorough understanding of how to put the science of management to work for themselves and their organizations. An organizational psychologist by training and experience, author Gary Latham brings a unique perspective to the art-versus-science debate as he underscores the critical role that empirical research plays in successfully hiring and managing employees. Latham advocates using the "situational" interview style in the hiring process over the "free-flowing" one, for example, as it's proven more effective in assessing a candidate's skills and aptitude. Written in an accessible, conversational style, *Becoming the Evidence-Based Manager* draws upon 50 years of management research, and provides
