Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City–based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

International Freight Transport presents the key changes and issues in the fast-moving industries of trade and transport. It includes regional trade groupings, emergence of new large economies (i.e. BRIC countries), and pivotal regions such as the Middle East and Central America where major projects, such as new and widened canals, are underway or planned. These changes could redraw the trade map with major implications for transport patterns and solutions. Blending geography, economics, politics and trade, International Freight Transport provides insight into a wide range of topics, including: globalisation; demand versus supply; buyers and sellers; transport regulation, geography, modes and methods; transport ownership; alliances; and safety and security. The book is the only comprehensive and accessible book on international transport available.

Direct injection enables precise control of the fuel/air mixture so that engines can be tuned for improved power and fuel economy, but ongoing research challenges remain in improving the technology for commercial applications. As fuel prices escalate DI engines are expected to gain in popularity for automotive applications. This important book, in two volumes, reviews the science and technology of different types of DI combustion engines and their fuels. Volume 1 deals with direct injection gasoline and CNG engines, including history and essential principles, approaches to improved fuel economy, design, optimisation, optical techniques and their applications. Reviews key technologies for enhancing direct injection (DI) gasoline engines Examines approaches to improved fuel economy and lower emissions Discusses DI compressed natural gas (CNG) engines and biofuels

When Andy Grant's eyes blinked open from a 10-day coma in February 2009 he was alone in a hospital bed in Birmingham. He had a broken sternum, a broken leg, a broken elbow and shrapnel lodged in both forearms. He had a severed femoral artery, nerve damage to his hands and feet as well as deep gaping wounds in both of his cheeks. He had been blown up during a routine foot patrol in Afghanistan. Within days of coming to his senses, a doctor told Andy that because of the blast he would no longer be able to have children. You'll Never Walk is his story. The tale of a Scouser who had to cope with losing his mum at the tender age of 12. The story of how a dream career in the Royal Marines descended into nightmare at the hands of the Taliban. The

painstaking account of how he grew back six centimetres of shattered bone in his leg and learned to walk again. However, Andy wanted to run and push himself to the very edge of his limits and so he made a colossal decision. Against doctor's advice and pleas from his father, he chose to have his leg amputated. The operation was a success, although there was a minor twist. Where once Andy's treasured Liverpool FC tattoo had carried the message 'You'll Never Walk Alone', surgery to create a stump removed a key word from the slogan. The scars of his amputation had been decorated with an ominous new motto, which read 'You'll Never Walk...' Andy would walk again – he would do much more than that. Armed with a running blade he learned to run and play football, scaled mountains in South America and Italy and claimed two gold medals at Prince Harry's Invictus Games. Through public speaking he brought hope to people right across the country. In 2016, he set his sights on a 10k below-the-knee-amputee world-record and completed the run in an unprecedented 37 minutes 17 seconds. And, most precious of all, after every obstacle placed in his path, Andy became a father to a little girl.

has found a broader range of readers especially businessmen & economists. Covering all of the main topics, including panel data, that are expected in the first econometrics course, *Understanding Econometrics* uses a new, understandable approach that explains theory intuitively in English, not through a series of mathematical derivations. Recognizing that most students will not be doing economics graduate work, but that they may well need to understand econometrics and how to apply it, this new text focuses on the connection between theory and practice. The text uses a simplified notation system and examples that are integrated with the explanations of the material, fostering comprehension so that the instructor can focus more readily on theory and applications.

In the *Book of Life*, Robert Collier shares with us the secrets of the ages. This book gives you the tools to have a happier and more successful life. Collier will show you how the way you think and the decisions you make have a direct influence on how successful and happy you are. Without the foundation that Collier laid herein, Rhonda Byrnes' *The Secret* could never have been written. Long before Michael Losier and James Arthur Ray reminded the world just how effective the power of positive thinking could be in *Laws of Attraction* and *The Science of Success*, there was Robert Collier's *The Book of Life*.

The "End of America?" Most likely. The "Demise of liberty?" You betcha! The "Destruction of Western Civilization?" Of course! But why let all of the above get you down? Learn to "Enjoy the Decline!" "Enjoy the Decline" is mandatory reading for all conservatives, libertarians, Americans, and lovers of freedom who are mourning the slow, but sure death of their culture and their country. America is over. Freedom will be curtailed. Liberty is dead. And above all else, it is inevitable. But the answer is not to get depressed and give up hope. The answer is to

change your attitude and learn how to "Enjoy the Decline." You get one life on this planet and Aaron Clarey explains how to get the most out of it even though socialism and tyranny are all around you. From learning how to adapt your psychology to learning to let go and take advantage of the socialist system, "Enjoy the Decline" carries the freedom loving American through the 5 stages of grief and puts them on a path to enjoy their life regardless of what is happening to their beloved America. Dark, macabre, and morose, but truthful, helpful, and practical all the same, it is guaranteed to make you happier than your socialist counterparts even though they have everything they want. Make leftists, liberals, and progressives miserable. Enjoy the Decline!

A spiral-bound guide describing a simple step-by-step procedure for carrying out a rapid survey of nutritional status in emergency situations in Eastern Mediterranean countries, where natural and man-made disasters have been common. Emphasis is placed on the steps required to make quick but reliable estimates as a basis for subsequent action. Throughout, checklists, model forms, reference charts, and tables are used to facilitate rapid data collection in emergency situations. Decisions concerning the recommended minimum sample size, survey participants, and the level of analysis needed were made with the goal of striking a balance between the methodologically appropriate and the logistically feasible. The recommended method is based on simple anthropometric data and limited to children of preschool age. The result is a series of steps, appropriate to field conditions that can be followed by individuals with little statistical or epidemiological training and can produce the essential data needed for immediate decisions and interventions. The guide has eight

Further practical guidance is provided in a series of eight annexes, which include examples of systematic and cluster sampling, the CDC/WHO normalized reference table of weight-for-height, mean Z-scores, and corresponding prevalences below -2 Z scores, a list of equipment, and advice on using Epi-Info software for data analysis.

Guard, BPDU Filter, Root Guard, Loop Guard, RSTP, and MST Evaluate design and configuration best practices Learn how to manage LANs and troubleshoot common problems Local-area networks (LANs) are becoming increasingly congested and overburdened because of a dramatic increase in traffic, faster CPUs and operating systems, and more network-intensive applications. Many organizations that use network and computing technology use LAN switching to take advantage of high-speed traffic forwarding and improved performance of traditional Ethernet technologies that don't require costly wiring upgrades or time-consuming host reconfiguration. Cisco LAN Switching Fundamentals provides administrators of campus networks with the most up-to-date introduction to LAN switching within a traditional Ethernet environment. Cisco LAN Switching Fundamentals presents an in-depth look at modern campus network requirements. It provides an easy-to-understand introduction to LAN switching best practices using Cisco Catalyst switches. This book provides you with a wealth of details on the architecture, operation, and configuration of the Cisco Catalyst family of switches. You learn about a wide range of topics, including quality of service (QoS), multicast, Rapid Spanning Tree Protocol (RSTP), Multiple Spanning Tree (MST), private virtual LANs (VLANs), and configuration using the native and hybrid software interfaces. Design advice and configuration examples are discussed liberally throughout the book to provide you with the best perspective on effective deployment techniques. Finally, the book wraps up with a discussion of steps necessary to troubleshoot common problems and optimize LAN performance. Whether you are looking for an introduction to LAN switching principles and practices or a Cisco Catalyst configuration and troubleshooting reference, this book provides you with the invaluable insight you need to design and manage high-performance campus networks.

Contributions by Surhid Gautam and Lit-Mian Chan. This book presents a state-of-the-art review of vehicle emission standards and regulations and provides a synthesis of worldwide experience with vehicle emission control technologies and their applications in both industrial and developing countries. Topics covered include:

- * The two principal international systems of vehicle emission standards: those of North America and Europe
- * Test procedures used to verify compliance with emissions standards and to estimate actual emissions
- * Engine and aftertreatment technologies that have been developed to enable new vehicles to comply with emission standards, as well as the cost and other impacts of these technologies
- * An evaluation of measures for controlling emissions from in-use vehicles
- * The role of fuels in reducing vehicle emissions, the benefits that could be gained by reformulating conventional gasoline and diesel fuels, the potential

Year. Damocles aimed to observe, understand, and quantify the Arctic climate changes to assist global warming decision-making. Grant Redvers was leader during the whole expedition. There was a changing complement of 22 scientists and seamen on board during the 18 months. As the Tara expedition was a French initiative, there were 15 Frenchmen as well as three Russians and one crew member from Estonia, Norway and the USA. An article in the prestigious magazine, Nature, discussing the expedition, said: "on 28 May 2007, the ship came closer to the geographic North Pole than any ship ever before. At a latitude of 88 degrees and 32 minutes north, the Tara was just 160 kilometres away from the pole. That was not the only remarkable aspect about this expedition"

Most of what has been written about the recent history of Yugoslavia and the fierce wars that have plagued that country has been produced by journalists, political analysts, diplomats, human rights organization, the United Nations, and other government and intergovernmental organizations. Professional historians of Yugoslavia, however, have been strangely silent about the wars and the breakup of the country. This book is an effort to end that silence. The goal of this volume is to bring together insights from a distinguished group of American and European scholars of Yugoslavia to add depth to our historical understanding of that country's recent struggles. The first part of the volume examines the ways in which images of the Yugoslav past have shaped current understandings of the region. The second part deals more directly with the events of the recent past and also looks forward to some of the problems and future prospects for Yugoslavia's successor states.

Controversial, confrontational, and driven, Coach Geno Auriemma is a force to be reckoned with -- and the most accomplished male coach in women's basketball today. never rests. For Auriemma, life affords only the briefest moments of happiness -- a good round of golf, forty minutes of great basketball, a day at the beach with his family, a nice glass of wine -- while disaster is seemingly always waiting to strike. It's a fatalistic philosophy, a remnant of his hardscrabble early years, but it's an outlook that has driven him to unparalleled success. In this deeply personal memoir, Geno Auriemma reveals for the first time the man behind the legend. He talks candidly about his coaching style, famed for being one of the most demanding in all the sports world. He spills the beans about his stormy dealings with other coaches such as his archrival, Pat Summitt, of the University of Tennessee. And with warmth and a genuine love for his champions, he writes openly about Diana Taurasi, Sue Bird, Nykeshia Sales, Rebecca Lobo, Swin Cash, and all of his other UConn stars who have gone on to stellar WNBA careers. You get a courtside seat to all of the action -- including an epilogue on the 2004-05 season, as well as interviews with the team's most celebrated players. A rare look inside the soul of a true competitor, GENO is the story of how one passionate man overcame his own fears to achieve an extraordinary record of success.

History tells us that the intelligent, wealthy, and powerful Margaret of York had everything any woman could want, except for love. The acclaimed author of *A Rose for the Crown* takes us between the lines of history and into her heart. It is 1461: Edward, son of Richard of York, ascends to the throne, and his willful sister, Margaret, immediately becomes a pawn in European politics as Edward negotiates her marriage. The young Margaret falls deeply in love with Anthony Woodville, the married brother of Edward's queen, Elizabeth. But Edward has arranged for his sister to wed Charles, son of the Duke of Burgundy, and soon Margaret is setting sail for her new life. Her official escort: Anthony Woodville. Margaret of York eventually commanded the respect and admiration of much of Europe, but it appears to history that she had no emotional intimate. Anne Easter Smith's rare gift for storytelling and her extensive research reveal the love that burned at the center of Margaret's life, adding a new dimension to the story of one of the fifteenth century's most powerful women.

"In an intense tale of psychological suspense, a San Francisco psychiatrist becomes sexually involved with a female patient who suffers from multiple personality disorder, and whose pathological ex-husband is an Oakland homicide detective--from a Los Angeles Times Book Prize-winning author. Dr. Eldon Chance is a brilliant, lonely, forensic neuropsychologist with a long track record of getting involved with damaged, complicated women. While apartment hunting after separating from his wife, a series of bad decisions leads to Chance sleeping with a patient named Jaclyn Blackstone. Unfortunately her ex-husband is an Oakland homicide detective and the jealous type. Meanwhile, Dr. Chance meets a young man who goes by "D"; Chance believes he is a war-veteran, but he is in fact a deranged loner and self-styled Samurai skilled in the art of the blade. D is fascinated by Chance's tales of his tormented and increasingly dangerous affair with Jaclyn and advises him that her ex-husband will find a way to destroy Chance. As Detective Blackstone does indeed threaten the doctor, Chance and D plan a counter-strike. Meanwhile Chance continues his steamy affair with Jaclyn Blackstone (or is it one of her multiple personalities?) But the sexually voracious "Jackie Black" has a story that is far more complex and darker than he could have ever imagined ... Gritty, twisted, and impossible to put down, the surprises keep coming in Chance until the final page has been turned"--
